

FOUNDED 1900

THE ENGLISH SCHOOL
A SECOND CENTURY OF EXCELLENCE

Economics Society 2018-2019:

The Economics society allows English school students interested in Economics to expand their knowledge on the subject and at the same time engage in various activities that support the local community.

With the beginning of the school year, the Economics society helped to organize the charity car wash event, aimed at raising money for the fire victims in Greece. The event was a great success where more than 1000 euros were raised and donated to the well-known organization "Hope for Children", to support the "Stand by Greece" campaign.

In collaboration with the "We care We help" club of the English school we organized our annual Christmas initiative! This year's aim was to support Cypriot families and provide them with all the necessary items that help to bring the joy of Christmas. The campaign was extremely successful, with loads of food, clothes and toys donated by English School students and staff, as a result improving the lives of ten less fortunate Cypriot families.

Most importantly, members of the club had the opportunity to attend various economic lectures and panel discussions throughout the year, aimed at broadening student's knowledge and understanding of the subject of Economics outside of the classroom. Such events included lectures on crucial topics of current interest like Brexit and gender inequality. It is important to understand that the study of Economics becomes much more complex and interesting when it comes to real life applications.
